Paper Review Rubric

Saverio Giallorenzo and Marco Peressotti

This document is part of the material for the course DM869 at the University of Southern Denmark

What is the general context of the paper? (try to describe both the general field (programming, distributed systems, etc.) and the specific application (functional implementations, consensus algorithms, etc.))

What are the problems the authors want to address?

Why are those problems important (impact, theoretical and/or practical needs, etc.)?

What are the main contributions of the paper?

_____

_____

_____

_____

_____

Are there alternatives? In which way do they differ from this contribution?

_____

_____

_____

_____

_____

Is the paper well-written, i.e., is it clear from the paper how to respond to the previous points?

_____

_____

_____

_____

_____

Form and prepare to discuss your opinion on the paper, e.g., do you think the contributions solve the problems? To which extent (completely, what parts)? Why?

_____

_____

_____

_____

_____
